FOR DIGESTIVE HEALTH*

Enzyme Probiotic Complex contains 9 distinct, naturally-based protein, carbohydrate and fat-digesting enzymes, to help support the body's natural digestive process.* Enzymes help break down protein into amino acids, carbohydrates into simple sugars and fats into fatty acids that your body absorbs as nutrients for energy needs and cell growth.* If protein, carbohydrates and fats are not properly digested, they may be broken down by the bacteria in the gastro-intestinal tract, which can cause you to feel unsettled and out of balance due to inefficient digestion.

FOR INTESTINAL HEALTH*

Enzyme Probiotic Complex also contains 2 billion bio-active probiotic microorganisms per capsule.^ Probiotics not only support microbial balance of healthy intestinal flora, but assist in the body's natural digestive process and contribute to the healthy functioning of the immune system.* Intestinal microflora imbalance may lead to inefficient digestion. Additionally, balanced intestinal microflora helps promote a favorable environment for the absorption of nutrients, further supporting digestive health.* Enzyme Probiotic Complex is the ideal choice for those individuals looking for a superior level of dual nutritional benefits to help maintain more thorough and efficient digestion and gastro-intestinal wellness.*
